Registration option(s)

Our Club has three main skating groups who all participate in dryland activities, short-track and long-track speed skating:

Group A - Skaters aged as young as 4 years old. The program is structured to develop the learning on the ice in a fun, healthy, and safe environment. Through a variety of games and playful exercises, young skaters move forward, backward, jump, turn, brake, cross over, fall, and get up. The program, structured by certified instructors, aims to develop the overall skills of skaters so they can be agile on the ice in speed skates. Some skating experience is an asset, but older new skaters can also benefit from this group. Skaters can participate in hockey or figure skates and transition to speed skates (rentals available). Skaters can also start the season in speed skates, skate rental is available through the club.

Group B - Skaters aged 7 years old to 13 years old. Intended for intermediate skaters either moving up from our Group A program or skaters who can attempt to skate backwards, crossover on a corner, stop, and glide on one skate. This group focuses on learning how to speed skate. Coaches use games, drills, and on-track skating to establish good speed skating techniques. Many skaters start by participating in local and provincial speed skating meets. Some skating experience is an asset, but older new skaters can also benefit from this group. Skaters can participate in hockey or figure skates and transition to speed skates (rentals available). Skaters can also start the season in speed skates, skate pick-up is available through the club.

Group C - Skaters aged 11 years old to 18 years old. Intended for skaters wanting to train in the speed skating discipline. Off-ice dryland before or after practices are a regular part of this group and participation is strongly encouraged. Skaters prepare for speed skating competitions at the provincial, regional, national and international levels.
